

# Operation Pisstide

Mister “XSpy” and his subsequent homo-liberation story

Legal: All material on this document is declared legal property with ownership by Gay Nigger Association of America (“GNAA”).

# Preface

- All information on this document was gathered under legal pretenses. Open Source Intelligence or OSINT (coined by “OSINT Demon” [PeaPattern](#)) is defined as the collection and analysis of data gathered from open sources. The idea of open sources thus substantiates said legality.
- To the people that may attempt to dickride Mister Adam, we urge you to rethink about whether or not this man truly has the dexterity required to ‘hack into ROBLOX’.
- This document was purely done in order to compile and aggregate all information gathered – and also serves as a great starting point for future shitposting.

**DOCUMENT MADE ON JULY 13 FOR CONTINGENCY PURPOSES**

# Introduction

Mister XSpy frequently claims that he is the 'greatest ROBLOX hacker' of all time because of his 'partnership' with another Marfan-Syndrome retard, known as 'Bens'.

Together, this happy couple has had endless nights larping and engaging in various sessions masturbating to their own assumed 'infamy' within the community in hopes of their 'antics' going on display on the grand ROBLOXian limelight one day. Fortunately for them they need not wait longer; as Bens' brilliant idea of engaging in a series of highly retarded stunts earned them enough fame to build a Discord Server with the combined size and mental capacity that can rival that of XSpy himself. As one can imagine, quantity does not outweigh mental fortitude. Thus; one can see that select members of his server (and his brains) are filled with complete dogshit.

XSpy argues that his exploit should be held at the highest regard and claims he has **not been banned** using it. However, if one expands their mental horizon (much like a gay nigger would expand their asshole for their comrade), we can clearly tell this is due to the fact that 'XSpy' is the only user that has used it and it likely does not work in the first place.

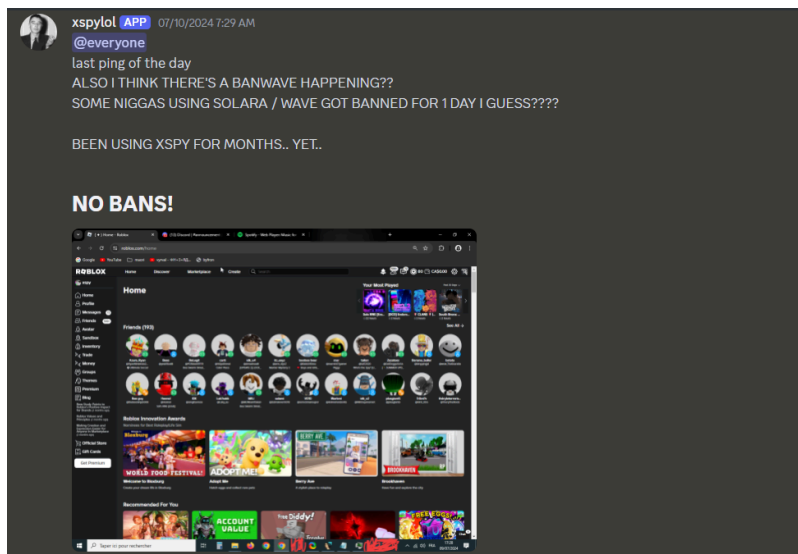

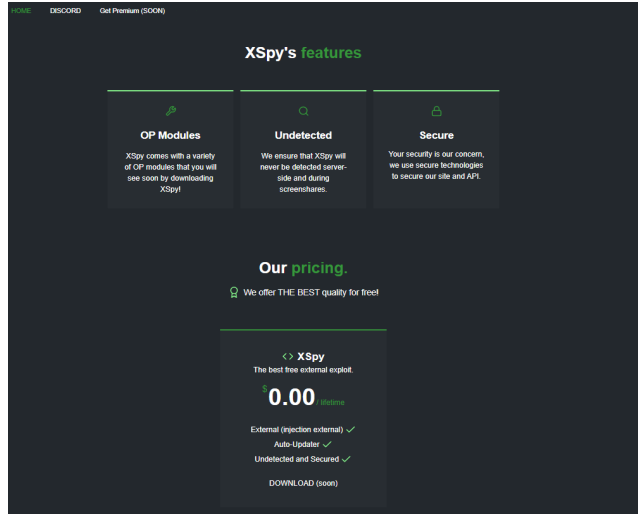

Exhibit A: XSpy shows off the fact that he is still on ROBLOX after a banwave.

Truly, a master hacker at work.

XSpy, before operating his very own mental asylum on Discord, operated his own exploit too (see: [xspy.lol](https://xspy.lol)). Unfortunately, the domain either got suspended or expired; so our fellow agents could not extract much besides a few images.

As you can imagine, he has enjoyed a noticeable increase in attention ever since Bens's amazingly executed plan to spam 500 reports on a famous ROBLOX account.

Ever since then, Mister XSpy has grown quite fond of himself – almost too fond, to the point where he would routinely shit on random members in his Discord Server to laud himself surreptitiously while a few of his diehard members endlessly ride him till dawn breaks. GNAA Incorporated however does not support this in any shape or form; thus we have begun conducting PeaPattern-esque monitoring on Mister XSpy.

As we have discovered, this man was not in fact one of the brightest futures of ROBLOXian exploiting (we would gladly surrender that title to ShowAss).

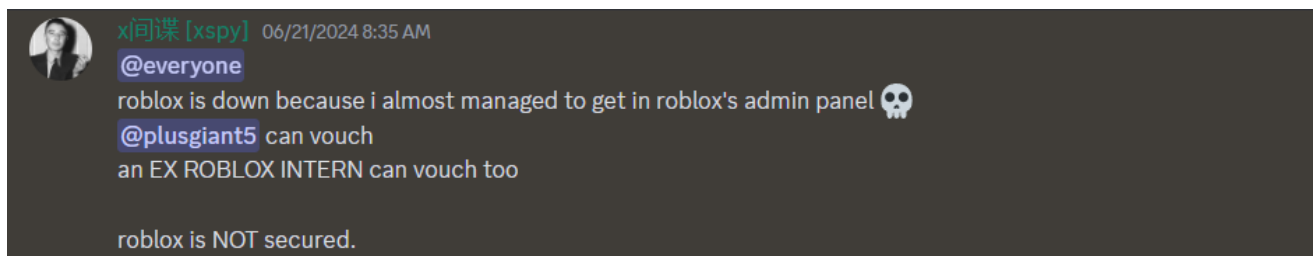

Exhibit B: This is the smartest nigga of all time.

For all the above pictures and reasons and primarily for the sake of entertainment, GNAA has introduced a new tool (previously private to conduct PeaPatterning on Mister "XSpy" (from this point onwards we will address XSpy as Adam Silini)) aptly named [Prolapse](#). As one can imagine, gannigger technology brings only the tipping precipice of proprietary PeaPattern technology for fielding.

Our GNAA members have put together an incredibly produced video for Adam and Bens to view at their own personal time. View the video by clicking on it below.

## PeaSinting

After realizing Mister XSpy does not have proper OPSEC in place, GNAA agents immediately sprang into action in hopes of restoring previous personal information regarding Mister Adam. As you can tell, we have recovered quite a large margin of previous stealer logs.

As it turns out, Mister XSpy was no stranger to Remote Access Trojans. As a matter of fact, XSpy was ratted over a record number of 400 times [hyp.]. Despite what XSpy claims (He claimed he is not in fact called Adam), he is **unfortunately** called Adam. Below is a short excerpt of one log we have obtained.

| username       | silini.ahcene                               | 1  |

We also identified several of XSpy's accounts, with one being an account he uses to bust nuts online:

[www.pornhub.com/login:1XSpy1](http://www.pornhub.com/login:1XSpy1) 

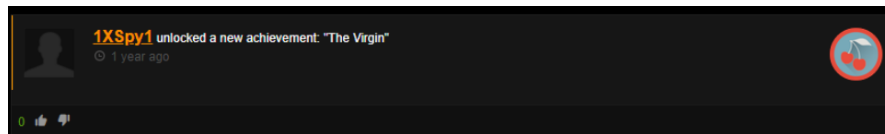

Exhibit C: Very aptly named award!

The main takeaways are that not only does XSpy retain executor power, but also the power of celibacy.

Furthermore, we identified his name through said stealer logs as "Adam Silini". (A fat, sad nigger from Quebec).

Mister Adam is suspected to attend [csmv.qc.ca](http://csmv.qc.ca) and may be residing at 1951 Rue Joliette, Longueuil, QC J4K 4X1, Canada (in coordinate form: 45°31'12.6"N 73°29'11.5"W). For the sake of accessibility (As we know many gay niggers are geo-illterate), here is a screenshot of his house (we are **unsure** on if this is his house but there are many references to this address on his computer, especially on the school website)

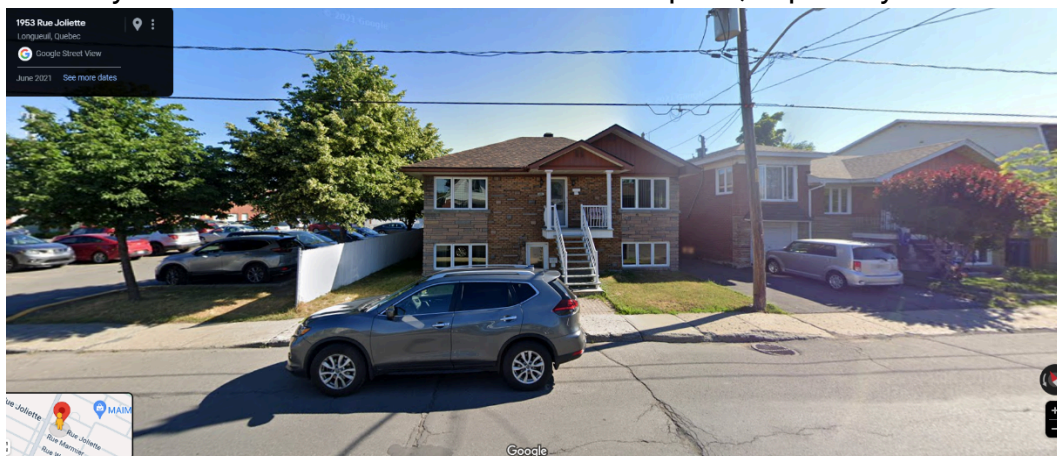

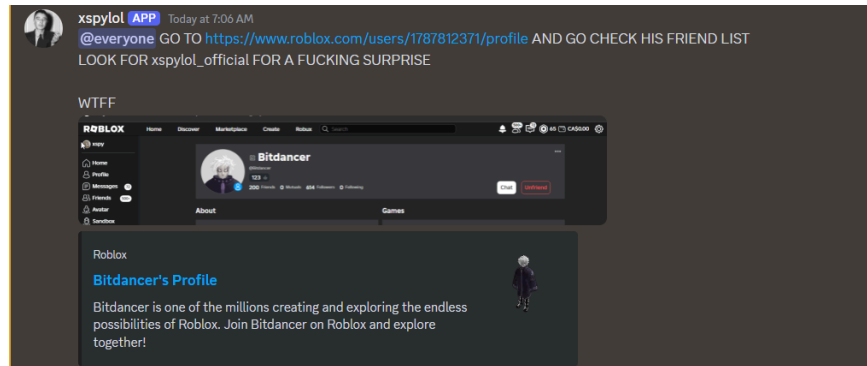

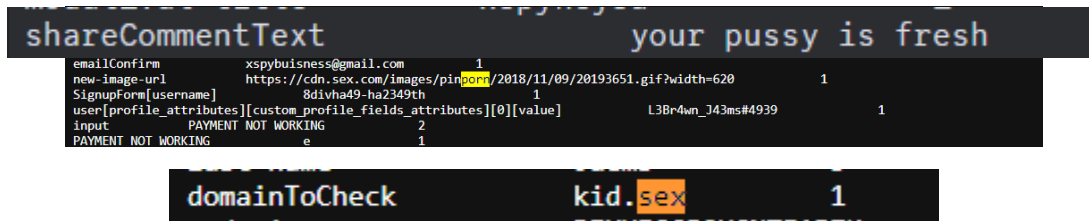

Exhibit D: Opsec demon??

In Adam's fight against the evil, disgusting anti-cheat that is Hyperion and Byfron Technologies, he has also routinely sucked Bitdancer off at every turn, such as this instance where he imploded in pure joy as he realized the glorious Bitdancer has granted him a meager friend request accept.

Also, here are more pictures of Mister Adam Silini being extremely sexually frustrated:

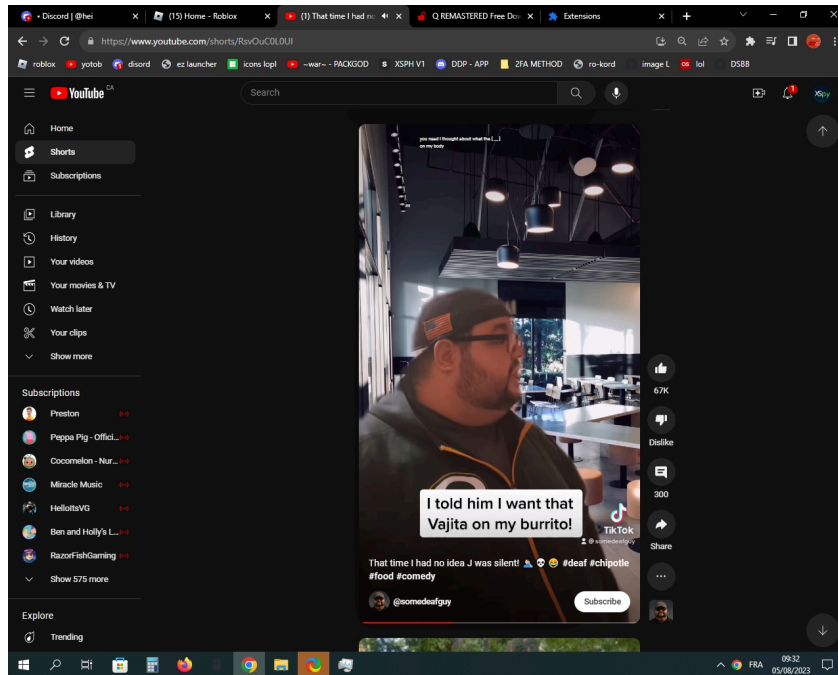

The last one is quite interesting, as it raises quite a few eyebrows for us. If Adam is interested, we could introduce him to another like-minded [individual](#).

Shown above is Adam's old github account "[GameMaker112](#)" and his previous interest in Discord nukers. This alone should introduce anyone to the level of competence that Mister Adam retains.

Here's some more images. Below is a screenshot of XSpy's old computer:

Doing quick digging yields his computer information as follows:

- PC: DESKTOP-RJ0733S
- User: s1510hdmi
- Domain:

- Workgroup: DESKTOP-RJ0733S
  - ComputerNameDnsHostname: DESKTOP-RJ0733S
  - ComputerNameNetBIOS: DESKTOP-RJ0733S
  - OS Version: Windows 10 (10.0.19045)
  - HWID: C8F8BB8D91AF2908CA2AF06C6207D91521EBD7D6
  - Screen Resoluton: 1280x1024
  - Language: en-US
  - CPU Name: Intel(R) Core(TM) i5-2400 CPU @ 3.10GHz
  - GPU: Intel(R) HD Graphics
  - Physical Installed Memory: 10240MB
- 
- IP Address: 38.133.52.146
  - Country: CA

Further digging yields us a compiled list of login details, which we will link [here](#).

Within this login details file, notice this entry:

```
dash.infinityfree.com/login:robux8732@gmail.com:Deleted_Dev1
```

This is one of many accounts that can be logged in simply through his old credentials, Deleted\_Dev1.

Logging in, we are given access to [northstr.lol](#).

Shortly thereafter, a group of daring gay nigga operatives penetrated (i.e. zipped everything in the filebase) and exfiltrated (i.e. downloaded) the files. You can view the backend/frontend 'code' for XSpy's "executor website" in full glory on [GitHub](#). Yes, half the code is ChatGPT.

In case it gets taken down, you can download them here: [Useless DB](#) | [ChatGPT code](#)

## Further PeaSint

In spite of his own decadence seen in things like:

```
SOFT: Chrome
URL: https://www.livegore.com/register
USER: wow.neonazies
PASS: 1xspylol1
```

He has also routinely engaged in development of XSpy in his freetime (the exploit we referred to previously), a shitty exploit advertised to a bunch of self-congratulating assfags. He has developed a highly advanced key system which earned a total of zero bucks (through Linkvertise, which you can check via logs above). Further inspection of his [browsing history](#) proves he is a basic retard:

Unfortunately for Adam, he fails to meet any of his server-base's expectations by a wide fucking margin, evidenced by the fact that absolutely no one gives a flying fuck that XSpy executor operates; let alone exists. Anyway, back to further PeaPatterning Mister Adam, we compiled a list of **some** of his emails after only 2-3 searches:

[benishow826@gmail.com](mailto:benishow826@gmail.com)

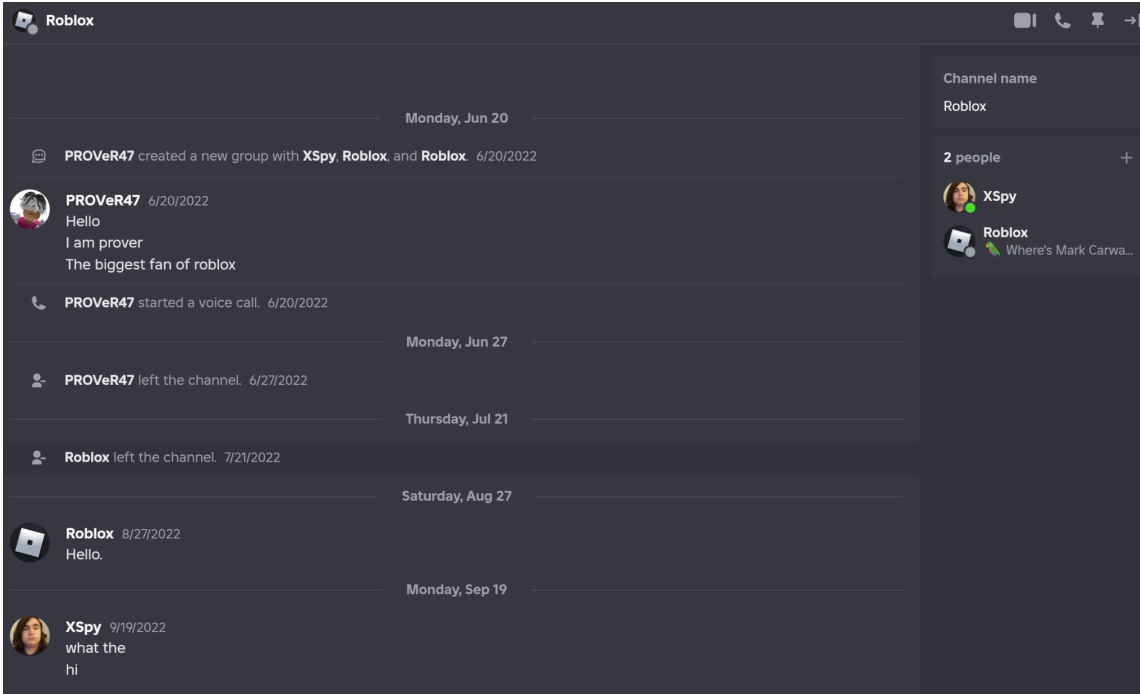

[deletedthedeveloper@gmail.com](mailto:deletedthedeveloper@gmail.com)

[robux8732@gmail.com](mailto:robux8732@gmail.com)

[xspybuisness@gmail.com](mailto:xspybuisness@gmail.com)

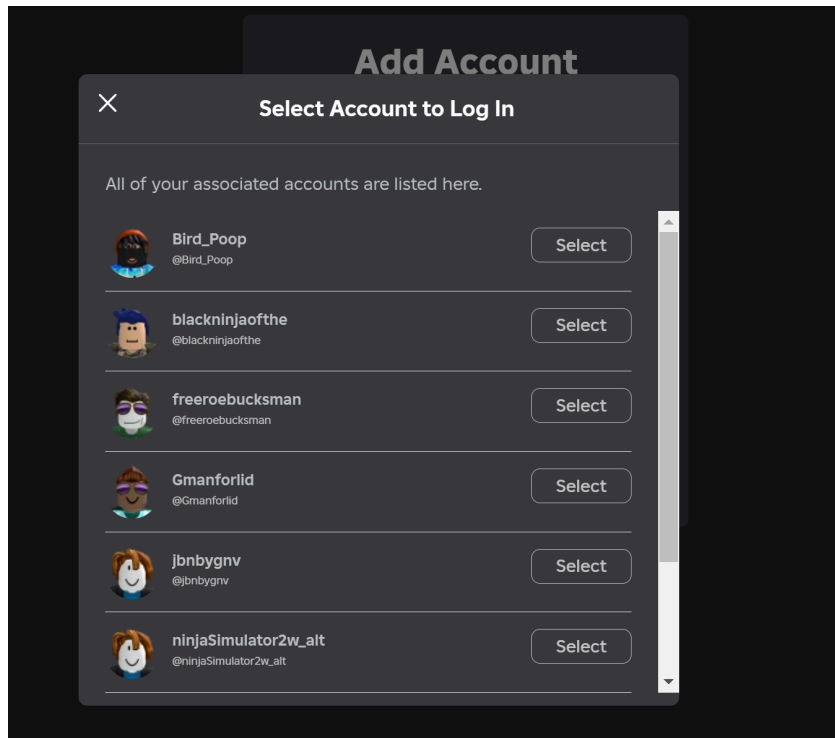

[3015294@csmv.qc.ca](mailto:3015294@csmv.qc.ca)

A thing worthy to note is his student ID 3015294 (potentially his student ID). Another one of his emails are [lebrawnjaems@gmail.com](mailto:lebrawnjaems@gmail.com), which has yet to be PeaPattered yet. robux8732 yields his Guilded account, which allowed a few elite, brave, courageous and highly erect gay nigger uber-operators to login to it:

GNAA agents promptly filled a select few servers with interesting content thanks to his account.

Another one of his emails allowed us access to this:

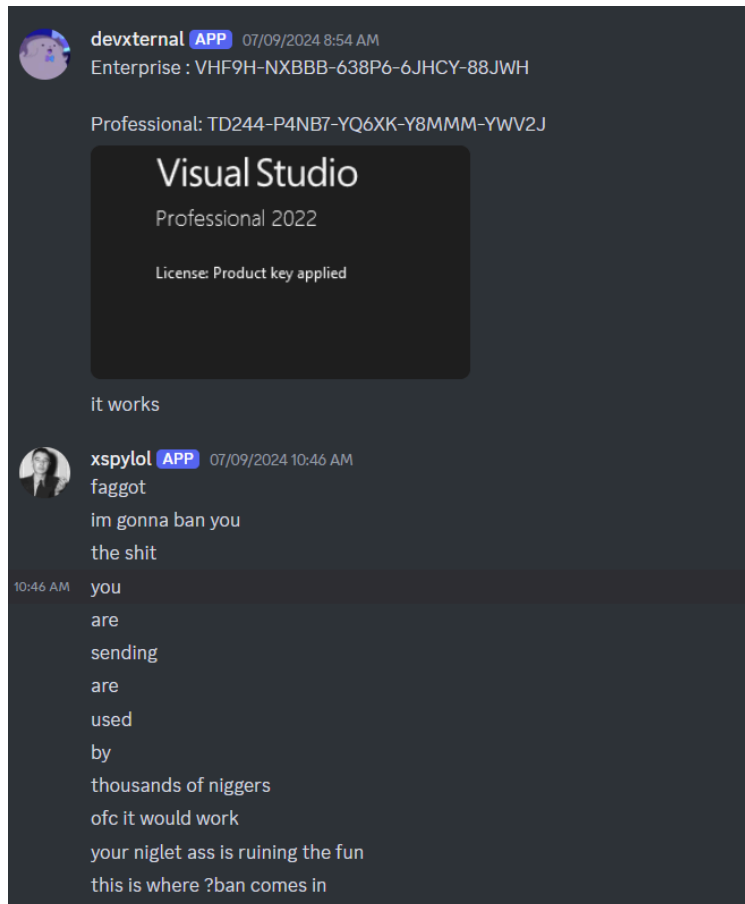

These accounts are obviously throwaways; note ninjaSimulator2w\_alt however for our future publishes on this document.

Meanwhile, a group of (pretty flirtatious and semen-pumped) gay niggas have gained control of northstr.lol and repurposed it physically (& sexually) for the advertisement of various new exploits; along with pro-gaynigger advertisement. GNA A believes repurposing this domain could help breed the next generation of true believers of gayniggadom. You can view a few of these 'purposed' arts at the domain [northstr.lol](http://northstr.lol).

We have also identified potential phone numbers through the use of gay nigger open source intelligence: (514) 437-2462 and (514) XXX-4565. The area code adds on to the fact that his address resides within Quebec.

Some gay niggers may argue that this is too short a document for XSpy given the volume of data we have uncovered; I believe that the breach logs speak much more for themselves than our narration. We have provided all links to download information on Mister Adam Silini as seen above.

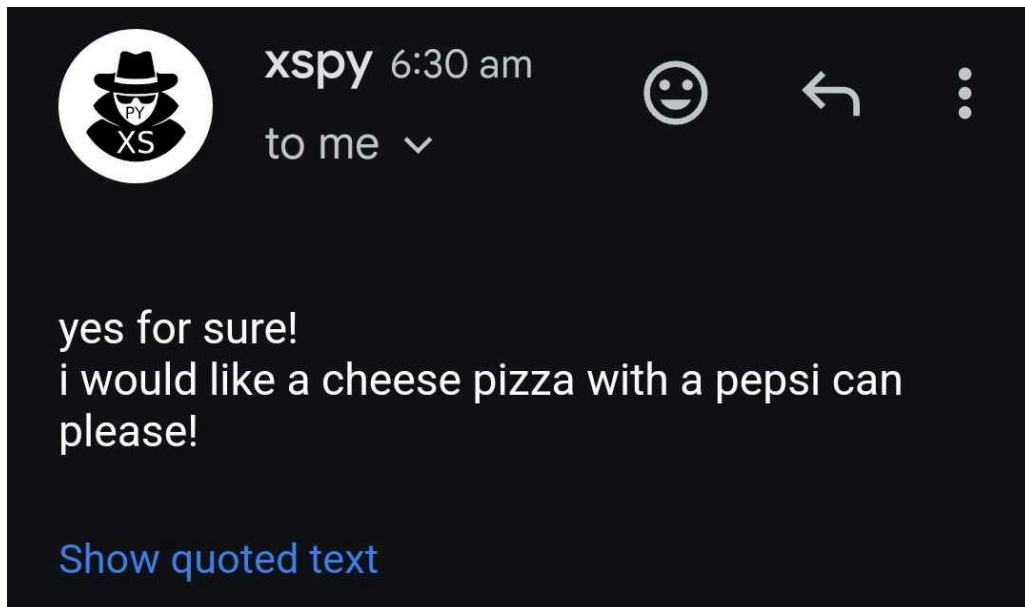

Adam gets really pissed over being confronted by a better alternative.

# Internal Review, inter alia.

It is safe to say that Adam Silini has a deep, burning and searing hatred for gay niggers. His indiscriminate banning of our fellow gay nigga diplomats is in of itself a crime worthy of dissertation; yet the fact he attempts to hide the fact that his real name is Adam is highly racist towards gay niggers - as it disproves and disregards hard work by our members (around 2 minutes of pure, adrenaline and testosterone fueled searching) to identify his logs, and could be argued as an act of racism towards us troubled, oppressed gay niggas. Thus, it is only right that we continue our liberation of him. By introducing him to the Association, we hope he subverts his previous behavior and join the ranks of many homo-thugs in the true path.

In his defense some may argue that he is a minor and that these actions are unnecessary. Yet some people are wrong - this individual has cunningly set up this pretense in order to shield himself from homo-liberation. Our members will work 25 hours a day, 7 months a week in order to truly convert Mister Adam Silini.

As GNAA is an association we routinely review our actions and we have unanimously decided that this does more benefit than harm.
